

Activity 05: Evidence and Decision Matrix

Leadership Masterclass · C904 · v4.0 · Fictional practice material

Goal

In this activity, you will compare alternatives and test assumptions using a fictional Meridian Services situation. You will discuss different perspectives, practise a leadership response and produce a reusable work artifact. The exercise connects the topic concepts to an everyday team decision, and the debrief focuses on how your response affects other people.

What you will build

A completed evidence and decision matrix worksheet, a peer observation checklist and a practical next action.

Fictional scenario

Meridian must choose a handover support option. Option A has quality/cost/resilience scores 4/3/4; B has 3/5/2. Scores use a fictional 1–5 scale where higher is better. Weights are 0.4/0.3/0.3.

Preparation

Read the scenario. Open worksheet.docx or print worksheet.pdf. Work in pairs or triads. Use sample-completed-worksheet.pdf after making your own first attempt.

Step 1

Record the decision, options, criteria and scoring direction before calculating.

Step 2

Calculate $A = 0.4 \times 4 + 0.3 \times 3 + 0.3 \times 4$ and $B = 0.4 \times 3 + 0.3 \times 5 + 0.3 \times 2$.

Step 3

Identify missing evidence and one bias that could affect the ratings.

Step 4

Change weights to 0.2/0.6/0.2 and recalculate: $A = 3.4$ and $B = 4.0$.

Step 5

Recommend a next action with uncertainty, owner and a condition that would trigger review.

Test it

Check each item in checklist.md, then ask a peer to identify one clear strength and one concrete improvement. Confirm that your proposed action has an owner and a review point.

Debrief

What evidence changed your view? Which trade-off remains? Which behaviour will you practise next?
