

Activity 07: Motivation and SMART Goal Canvas

Leadership Masterclass · C904 · v4.0 · Fictional practice material

Goal

In this activity, you will diagnose barriers and make a useful goal using a fictional Meridian Services situation. You will discuss different perspectives, practise a leadership response and produce a reusable work artifact. The exercise connects the topic concepts to an everyday team decision, and the debrief focuses on how your response affects other people.

What you will build

A completed motivation and smart goal canvas worksheet, a peer observation checklist and a practical next action.

Fictional scenario

Incomplete handovers occur in 18 of 100 cases. The team has little practice with the new template and conflicting priorities. The aim is at most 8 incomplete handovers per 100 within four weeks.

Preparation

Read the scenario. Open worksheet.docx or print worksheet.pdf. Work in pairs or triads. Use sample-completed-worksheet.pdf after making your own first attempt.

Step 1

Check whether the issue involves clarity, resources, capability, workload or motivation.

Step 2

Use intrinsic/extrinsic and autonomy/capability/connection lenses to form questions, not labels.

Step 3

Write a SMART goal with baseline, target, owner and time window.

Step 4

Choose a support action and a balancing measure that reveals transferred workload.

Step 5

Agree a weekly review and explain how you would revise support if results do not improve.

Test it

Check each item in checklist.md, then ask a peer to identify one clear strength and one concrete improvement. Confirm that your proposed action has an owner and a review point.

Debrief

What evidence changed your view? Which trade-off remains? Which behaviour will you practise next?
